

BIBLIOGRAPHIES and REFERENCE LISTS

Bibliographies and reference lists are often treated similarly, however they have different functions in a text. Bibliographies are a list of all of the sources of information that have been looked at during the research process. Reference lists are just the sources that have been referred to in the text. The format for citations in both bibliographies and reference lists are as follows:

Book	Author Last Name, Initial., (date) <i>Title of book in italics</i> , Publisher: Place of publication, p. page number
